

6TH SYMPOSIUM ON RESILIENCE ENGINEERING

Managing resilience, learning to be adaptable
and proactive in an unpredictable world

22-25th June
2015 | Lisbon, Portugal

Rua Vitorino Nemésio, 5 | 1750-306 Lisboa
Tel: +351 21 751 37 00 | 96 137 65 03
Fax: +351 21 757 39 66 | posgraduacoes@isg.pt

www.isg.pt

The world-wide interest in building and managing resilience continues to accelerate. The Resilience Engineering Association was one of the first forums for sharing results on how resilience is built, and sometimes lost, and for exploring new techniques to grow and sustain sources of resilience. Producing and sustaining resilience requires coordination and synchronization across multiple roles, organizations, and levels, but fragmentation across organizational boundaries can hold back advances. The 6th International Symposium on Resilience Engineering seeks to accelerate the progress to build resilience across all industrial sectors.

We encourage proposals for papers, but also importantly, panels, discussions, mini-workshops, and other ideas to share results and explore new possibilities.

| PROMOTED BY

KEY DATES

October 15:

Submission site opens for proposals for abstracts and workshop themes.
Templates will be on our website soon. Send proposal to papers2015@rea-symposium.org

January 9:

Submissions due

March 2:

Notification to presenters

April 4:

Delivery of full paper or road map for workshop

April 18:

Notification of acceptance of papers

June 5:

Posters due

| HOSTED BY

UNIVERSIDADE
LUSÓFONA
